

C-IED Lanes/ Warrior Road

- Warrior Road is approximately 22 kilometers of roadway in varied terrain
- Three lanes each including: divided highways, guardrails, culverts, traffic circles, overhead obstacles, villages, broken down vehicles
- Virtual Battle Space (VBS-2) gaming classroom includes a 50-student classroom at MATES in close proximity to the Orchard Combat Training Center
- VBS-2 scenarios virtually replicate Warrior Road and OCTC terrain and can also replicate other terrain scenarios including current overseas operating environments
- C-IED Integration Cell available to provide instruction, training aids, and a large selection of simulators and pyrotechnic devices to create realistic training scenarios
- Crawl, Walk, Run phases of training include classroom instruction with dismounted Visual IED Indicator Lanes, VBS-2 gaming simulations, and convoy operations along Warrior Road
- A full spectrum of other training tasks, such as react to direct-fire ambush, etc., can be incorporated into C-IED convoy training along Warrior Road to maximize training time
