

RANGE 3

Forward Arming and Refueling Point/Unmanned Aircraft System

- Accommodates all rotary-wing FARP and Harmonization operations to include CH-47
- Designed to assist in helicopter power management limitations
- Near MPRC-H for all aerial gunnery, door gunnery tables and ordinance delivery
- Operations building with tower, AAR building or conference room / classroom, and storage
- Infrastructure facilitates all rotary-wing communications capabilities
- Co-located Ammunition Holding Area for armament storage
- Easy access for ground support equipment and personnel
- Allows for a battalion (-) footprint on-site
- 1,000-foot paved runway for all tactical-sized Unmanned Aircraft Systems allows launching and landing in two directions
- Range 3 improvements include multi-directional CH-47 capable runways, 360-degree control tower, and in-ground fuel line protection
